*Note : Answer all the questions.*

1. Fill in the blanks with the correct symbol/word(s) by selecting from the choices given in the brackets :  $10 \times 1 = 10$
- i) FORTRAN is a ..... level language.  
( *high, low, assembly* )
- ii) Symbolic representation of a program is .....  
( *Algorithm, Flowchart, Code* )
- iii) An identifier whose value does not change throughout the program is called a .....  
( *label, block of, constant* )
- iv) Any expression whose output either true or false is called as ..... expression.  
( *relational, arithmetic, logical* )
- v) The symbol used for an address operator is .....  
( *%, \$, &* )
- vi) The escape character used for line feed is .....  
( *\n, \t, \f* )
- vii) ..... operators are used to combine two arithmetic expressions.  
( *Relational, Unary, Assignment* )
- viii) Repeated execution of a set of statements is called .....  
( *parameter, loop, argument* )
- ix) ..... statement allows to skip to the beginning of a control from within a structure.  
( *continue, goto, exit* )
- x) ..... statements provides an immediate exit from the control structure.  
( *Switch, Nesting, Break* )

2. a) Define hardware. 2  
b) Write short notes on low level language. 3  
c) List the advantages of assembly language. 5
3. a) Define algorithm. 2  
b) What are the characteristics of algorithm ? 3  
c) List the basic symbols used in flow-charts. 5
4. a) Define lexical elements. 2  
b) How do you classify C token ? 3  
c) What are the important features of C language ? 5
5. a) Define C character set. 2  
b) What are the different types of expressions ? 3  
c) What are the basic types of statement in C ? 5
6. a) List the types of operators in C language. 3  
b) Write a C program to convert Fahrenheit temperature to Centigrade temperature. 7
7. a) Write short notes on relational operators. 3  
b) Write a C program to check whether the given number is odd or even. 7
8. a) What are prefix operator and postfix operator ? 3  
b) Write a C program to convert decimal to binary. 7
9. a) List the arithmetic operators available in C language. 3  
b) Write a C program to find smallest of 3 numbers using conditional operator. 7
